<Kitchen Knife in a Bag for Plastic Containers & Packaging!! >

In April, there was a kitchen knife unwrapped in a collection bag that was taken out as plastic containers & packaging. Workers at Recycle Center need to separate if it's recyclable or not with their hands one by one for those waste. It's very very dangerous for them to check such a waste. It might cause injury of workers or damage of machines. You should wrap a knife (or something like sharp-edged matters) in paper or so and besides write what's in paper on the outside.
